Application/Control Number: 10/717,063 Page 2

Art Unit: 2627

Allowable Subject Matter

Applicant has amended the claim to overcome the 35 U.S.C. 112, second paragraph

rejection.

Accordingly, none of the reference of record alone or in combination disclose or suggest

a method of mass producing double-sided optical discs, said discs having one or more data layers

on each side, comprising:

providing data from a controller to a master producing process;

producing with the process master discs, including a set of master discs for the layer or

layers of one side and second set of master discs for the layer or layers of the other side,

the first set of master discs having data arranged along a first spiral, and the second set of

master discs having data arranged along a second spiral,

said first and second spirals being mirror images of each other; and using said master

discs to form said double-sided optical discs.

said first set of master discs includes an inner and an outer master disc for the first side

and the second set of master discs includes an inner and an outer master disc for the second side;

wherein the step of producing said master discs includes forming on said discs at

least one special area defining rotation direction indicia for the discs to be mass produced,

said special area including data disposed in a third spiral opposite the direction of the first

spiral.

Therefore, claims 1,4,5,7-14 and 16 are allowed.

Conclusion
